

Semi-Permanent Ramps

SPR

Steps and raised thresholds are the single biggest barrier to independent access for people with a mobility impairment. The Configure semi-permanent ramp is an external aid for all persons with mobility impairment. The ramp fits in beautifully with any backdrop and is very simple to erect and dismantle.

The semi-permanent ramp can have cost saving advantages over permanent ramp installations. For example, the ramp can be relocated or modified if the use or configuration of the building changes.
